**Financial Report**

- 226,728.12
- 314,221.89

**Notes**

- The membership list includes all committee members as of October 4, 1984.
- The financial report details the fiscal year 1984 balances and expenditures.

**Legislative Committee Report**

Legislative committees may be brought against architects, engineers, or land surveyors. Legislation will provide a time limitation in which laws are enacted, and it is crucial to introduce legislation to address these issues.

A synopsis of the legislation is as follows:

1. Requires that any lawsuit must be commenced within two years after the act of omission or fault.
2. Provides that any lawsuit may be brought within two years after the act of omission or fault.
3. Provides that any claim may be brought within two years after the act of omission or fault.

**Secretary's Report**

- The 1985 regular session of the Alabama Legislature is expected to start in January.
- There is a unified effort underway by archtects, engineers, and land surveyors to introduce legislation.
SUCCESSFUL TRAFFIC SEMINARS

The seminars were presented to 257 persons.

"Traffic Control Devices" was handled by the Alabama Division and consisted of lecture, discussion, and demonstrations. The class was presented in Montgomery, and in Jefferson County, and in Solihull, England. The meeting was held by John Turner, prepared a set of slides which were used in the lectures.

The seminars were attended by traffic control engineers, transportation officials, and other interested parties. The seminars were well received and the feedback was positive. The Alabama Division has worked with the Alabama State Police and the Alabama Department of Transportation to develop traffic control devices for use in Alabama.

The division's Traffic Control Devices Committee has been hard at work developing traffic control devices that meet the needs of Alabama. The committee has been working on a variety of projects, including the development of new traffic control devices, the revision of existing devices, and the evaluation of traffic control devices from other states.

The Alabama Division has been working with the Alabama State Police, the Alabama Department of Transportation, and other state and local agencies to develop traffic control devices that meet the needs of Alabama.
